

Pharmacy Benefit Analysis & Audit

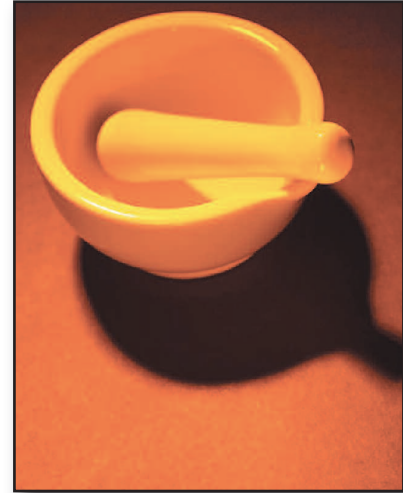

ÆGIS HEALTH CARE
CONSULTING, LLC

Ægis principals have extensive, hands-on experience with:

- Pharmacy Benefit Manager operations
- Prescription drug claims and pricing
- Retail and mail-order pharmacy
- Prescription drug benefit analysis and design
- Experts on pharmacy billing fraud

Our experts have a sophisticated and unique insight into the industry's business practices.

We help clients recover prescription claim overpayments and renegotiate their PBM agreements, *producing significant, long-term savings.*

Why audit your PBM?

Prescription drug benefits have grown into a major expense burden. But how much cost is directly due to your Pharmacy Benefits Manager (PBM) practices?

PBMs often:

- Hide their major sources of profit
- Design benefit plans to maximize PBM profits
- Charge group health plans more than they pay the pharmacy
- Retain over 50% of drug manufacturer rebates
- Overcharge for generics from their own mail order pharmacy
- Have been subject to federal/state judgments and class action & whistle-blower lawsuits

Is your PBM acting in your best interests – or theirs?

Experience Ægis Experts. Experience Results.

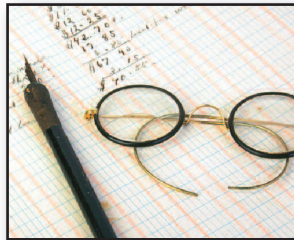

Ægis Health Care Consulting Services

To assure prescription benefits were paid correctly, Ægis performs a comprehensive evaluation of your benefit program including:

- Member eligibility
- Pricing accuracy
- Correct dispensing of days supply
- Benefit plan compliance
- Rebate payments
- Mail order and specialty pharmacy services

Most firms only “sample” a small number of claims and extrapolate their conclusions. We conduct a complete audit of every prescription drug claim to accurately evaluate PBM performance.

Accuracy, validity, and financial savings are trademarks of Ægis' *PBM Analysis & Audit*.

Don't Expect - Inspect!

As a matter of due diligence, plan sponsors should inspect their PBM contract to validate their vendor's performance. Like a second medical opinion, our independent and unbiased *PBM Analysis & Audit* is a prudent and cost-effective business practice.

Our analysis and audits often produce significant financial recoveries and an improved pharmacy management program.

- Audit recoveries are at least 2% of annual drug expenditures.

Maximize control and savings of your prescription drug benefits.
